

Sample Screenshot

Output Screenshot

Scenario 1 - When the user does have access to SaaS platform access.

Scenario 2 - When the user does not have access to SaaS platform access.

You are not authorized to access ABC Platform.

The screenshot shows the Chrome DevTools Network tab. A request to `http://localhost:3000/api/users/1` is selected. The status is 200 OK. The payload is a JSON object: `{ "status": 200, "message": "User found" }`. The 'Headers' pane shows the request headers, including `Accept: application/json` and `Content-Type: application/json`. The 'Timing' pane shows the request took 100ms.
